

Client Relationship Management

Unified platform for aging services coordination across provider networks

Built on Salesforce Government Cloud Plus, this platform unifies operations where agencies configure permissions and forms, providers deliver services through modern interfaces, and seniors manage their profiles independently. The system handles intake, assessments, enrollment, service tracking, referrals, and compliance—connecting staff, hundreds of providers, and hundreds of thousands of constituents in one ecosystem.

KEY CAPABILITIES

- Agency admin for provider permissions and forms
- Dynamic forms adapt to program requirements
- Multi-program enrollment with referral workflows
- Service unit tracking for reimbursement
- QR code check-in at centers and events
- Field service with route optimization
- Senior portal for profile management
- Real-time compliance dashboards

WHY THIS MATTERS

- Agency ownership enables fast system updates
- Unified data improves reporting accuracy
- Modern interfaces increase productivity
- Automated workflows reduce manual effort
- Self-service empowers constituents
- Audit trails ensure compliance
- Scalable from local to statewide programs
- Proven in high-volume operations

Key Features & Modules

The Right Team.
The Right Outcomes.™

Modules designed for efficient service coordination across all stakeholders

Administrative Control Platform

Agency staff configure provider capabilities, program licenses, user permissions, and forms. Control referral pathways and monitor compliance across the entire service network.

Dynamic Assessment Forms

Program-specific forms built with Lightning Web Components adapt based on responses. Agency staff configure forms without developer involvement for fast updates.

Client Intake & Profile Management

Digital consent capture, demographic collection, and duplicate detection with fuzzy matching. Single client profile enables enrollment across multiple programs.

Service Unit Tracking

Document service delivery with validation rules specific to each program type. Ensures accurate provider reimbursement and compliance reporting.

QR Code Integration

Streamlined check-in at centers and events using scannable ID cards. Reduces administrative burden for attendance tracking and service verification.

Field Service Optimization

Route planning, navigation, and delivery verification for home-based services using Salesforce Field Service Lightning with mobile access.

Referral Management

Seamless referrals between providers and programs. Agency staff configure which programs can refer to each other with automated workflows.

Senior Self-Service Portal

Accessible portal where older adults update contact information, manage meal preferences, view scheduled services, and discover available programs.

Volunteer Management

Recruit, screen, schedule, and track volunteers supporting program delivery. Includes background checks, skill matching, and hour tracking.

Dashboards & Reporting

Real-time dashboards and reports for all user levels. Track metrics, monitor application volumes, analyze placement rates, and generate compliance reports.
